Access to the main functions of www.425dxn.org is provided by the 425DXN App for Android. It is available on Google Play - free of charge, no ads. Enjoy!

IOTA NEWS ---> The logs for the IOTA Contest 2023 island stations have now been added to the IOTA database and are available for QSO matching. Record-holders who have made IOTA contacts in an IOTA contest after 2003, can claim credit for them without submitting QSLs, provided that the contact details match. Go to <https://iota-world.org/>, log in, select "Add Contest QSOs" under the "My IOTA" tab, and choose either "Upload Contest Log" or "Manual QSO Entry". The 2023 RSGB IOTA Contest complete results are available on

<https://www.rsgbcc.org/cgi-bin/hfresults.pl?Contest=IOTA%20Contest&year=2023>

W8S: PLANS ---> The team flew to Pago Pago, American Samoa on 28 September. They will stay there for a few days to buy the latest supplies, do a final check of all the equipment, configure the laptops and radios, and - if they have time - be QRV as KH8/homecall for a few hours. They expect to reach Swains Island on 4 October and spend the remaining daylight hours setting up as many antennas as possible in both camps. They hope to be QRV that same night, but everything depends on local conditions.

When the operation is running, logs will be sent daily to M00X0, who will also update Club Log. Charles will take care of the QSL management for the DXpedition, see <https://swains2020.1ldxt.eu/qsl-policy/> for the details.

W8S: PROPAGATION ---> Jari, OH6BG of VOACAP fame has made up a default DX propagation chart for the DXpedition to Swains Island. The timeframe in October as well as the antennas and power that will be used on the island are set by default, so you only have to put your grid square and antenna situation in the designated boxes and the chart will show you the best bands and times to make it into our log. The direct link to access the prediction chart is <https://www.voacap.com/dx/swains/>.

In addition, Danny, KD5W has published a short video on how to read the VOACAP charts: <https://swains2020.1ldxt.eu/propagation/>.

ZD9W ---> Yuris, YL2GM left Cape Town on 15 September. The voyage was delayed by two storms; the vessel reached Tristan da Cunha on 27 September but was unable to land passengers until 29 September at 8.30 UTC.

QSLs received direct or through managers: 3D2RRR, 3X1A, 5A1AL, 5K0YD, 5X2I, 9Q1AA, 9Q1ZZ, BA3KY, CE7VP, CY0S, DX0NE, E51CIK, E51WEG, FK8HA, FP/KV1J, FR4OO, HZ1TT, JW8EKA, KH8RRC, OX7AKT, OY1CT, PE55TEX, PJ5/PE6Q, PJ7AA, PR6T (SA-080), PT6D (SA-023), T88AQ, T88SM, V26DX, VP6A, VU2GSM, XF2C (NA-135), XF3H (NA-045), XF3M (NA-045), XF3O (NA-090), YI3MUT, ZD7BG, ZS9V (AF-064).
